3. Estando o ServInfo limitado a um máximo de 6000 linhas de aeroporto, não foi possível adicionar todos os aeroportos de que dispunha.
A opção tomada foi em manter os aeroportos no update da "VATSIM" e adicionar todos (ou quase) os aeródromos Portugueses, incluindo Caniçada-Gerês e Lagoa Comprida do Splash Club na secção [Airports].

Foram compilados 1.112 novos aeroportos, que junto no ficheiro "Airports.txt" para que possam efectuar as trocas segundo as vossas preferências.

4. Adicionei 7 novas linhas na secção [Countries].
Lista no final deste documento.

5. A secção [Controls] recebeu mais 69 entradas!
Lista no final deste documento.

6. Esta compilação permitiu inserir 120 novos tipos de avião na secção [Aircrafts].
Lista no final deste documento.

7. Junto também um "save" do ServInfo que permite visualizar todos os "Tugas" ligados, no "tab" Selected Details.

Instalação

1. Instalar a versão 2.02 do ServInfo, que está em:
<http://avsim.com/hangar/utils/servinfo/downloads.htm>
2. Efectuar um backup da pasta “**ServInfo**”.
3. Os ficheiros disponibilizados no update da “VATSIM” estão incluídos neste update, é portanto indiferente se já tem ou não o «**"VATSIM-Official" ServInfo database update**».
4. Colocar os ficheiros (airlines.iva – fir.dat – servinfo.dat - Tugas.sel) e a pasta (Logos), incluídos neste Zip na pasta do ServInfo sobreescrevendo os existentes.
5. No ServInfo em "Selected Details", seleccionar na Caixa de selecção o ficheiro Tugas e colocar o visto na opção "Make this the default".
